Please <u>initial and sign</u> to your acknowledgement and consent for Medical Treatment, Notice of Privacy Practices, Authorization to release medical information and Payment Policy.

Thank you for choosing Advanced Urology as your provider. We are committed to providing you with quality and affordable health care. Please be sure to carefully read our payment policy. A copy will be provided upon request.

- *Insurance*. We participate in most insurance plans, including Medicare. Knowing your insurance benefits is your responsibility. Please contact your insurance company with any questions you may have regarding your coverage.
- Co-payments and deductibles. All co-payments and deductibles must be paid at the time of service. This arrangement is part of your contract with your insurance company. If your account is turned over to a collection agency, a \$100 collections processing fee will be added to any outstanding balance.
- **Non-covered services**. Please be aware that some of the services you receive may be non-covered or not considered reasonable or necessary by Medicare or other insurers. You must pay for these services in full at the time of visit.
- **Proof of insurance**. All patients must complete our patient information form before seeing the doctor. We must obtain a copy of your driver's license and current valid insurance to provide proof of insurance. If you fail to provide us with the correct insurance information in a timely manner, you may be responsible for the balance of a claim.
- Claims submission. We will submit your claims and assist you in any way we can to help get your claims paid. Please be aware that any unpaid balances are your responsibility.
- **Coverage changes**. If your insurance changes, please notify us before your next visit so we can make the appropriate changes to help you receive your maximum benefits.
- **Nonpayment.** If your account is over 90 days past due, you will receive a letter stating that you have 20 days to pay your account. Please be aware that if a balance remains unpaid, we may refer your account to a collection agency.

IN	ITIAL	. HERE

I have reviewed and consent to the following:

- I voluntarily present for treatment and consent to my provider to provide my care. Such care may include, but is not limited to, diagnostic procedures, blood draws, laboratory tests, medication administration, and other procedures considered advisable in my diagnosis, treatment and course of care.
- I acknowledge that my treatment is intended to address specific illnesses and is not intended as a substitute for a primary care physician and that no guarantee can be made or has been made as to the results of treatments or examinations at Advanced Urology.
- In the event an employee has a needle stick or otherwise is exposed to my blood or body fluids, I
 consent to testing for HIV or Hepatitis C & B.

5.	Is this penile deformity negat	ively affecting se	x for you or your p	oartner?	Yes	No

International Prostate Symptom Score for Men Over the Age of 40

Many men over the age of 40 suffer from Benign Prostatic Hyperplasia (BPH). This is a non-cancerous enlargement of the prostate. Your provider will use this form to assess your symptoms and will discuss your score with you.

AUA AND BPH SYMPTOM SCORE	Nam	e:				
DIRECTIONS - Thinking over the past month, check what best describes the following. Then add all the checked numbers to get the total score	Not at all	Less than 1 - 5 times	Less than half the time	About half the time	More than half the time	Almost Always
1.INCOMPLETE EMPTYING – Over the past month, how often have you had the feeling of not completely emptying your bladder after you finished urinating?	0	1	2	3	4	5
FREQUENCY – Over the past month, how often did you have to urinate again less than 2 hours after you had finished urinating?	0	1	2	3	4	5
INTERMITTENCY – Over the past month, how often did you stop and start again several times while urinating?	0	1	2	3	4	5
URGE TO URINATE – Over the past month, how often did you find it difficult to postpone urination?	0	1	2	3	4	5
WEAK STREAM – Over the past month, how often did you have a weak urinary stream?	0	1	2	3	4	5
STRAINING – Over the past month, how often did you have to push or strain to begin urination?	0	1	2	3	4	5
URINATING AT NIGHT – Over the past month, how many times do you typically get up at night to urinate after going to bed?	0	1	2	3	4	5
Symptom Score: 1 – 7 Mild, 8 – 19 Moderat	e, 20 – 35 Se	evere		TOTAL SCC	ORE:	

BOTHER SCORE DUE TO URINARY SYMPTOMS						
Rate the bothersome level of your urinary symptoms by checking what best describes your feelings	Delighted	Pleased	Mostly Satisfied	Mixed	Mostly Dissatisfied	Terrible
How would you feel living the rest of your life with your current urinary condition the way it is now?	0	1	2	3	4	5

Are you interested in minimally invasive surgical intervention?	□Yes	□ No

Patient Name (LAST) ₋		(FI	RST)	([MI]	(Suffix)	
Date of Birth:	/	/	Phone:				

You may potentially receive opioid/narcotic therapy post operatively of the treatment of pain short term. It is vital that you understand these drugs are very useful but have a potential for misuse and are therefore closely controlled by local, state and federal governments.

The goal of this treatment is to:

- Reduce your pain
- Improve your level of function in performing your activities of daily living.

Our goal at Advanced Urology is to not initiate or continue opioid therapy whenever possible, but sometimes this may be warranted for more effective pain management.

Long term prescriptions for chronic pain will **NOT** be prescribed by any physician in the Advanced Urology practice. Any individual needing long term opioid/narcotic therapy for chronic pain will be referred to a pain management specialist.

SIDE EFFECTS

The potential side effects and risks of these medications include, but are not limited to:

- Mood changes
- Drowsiness
- Dizziness
- Constipation
- Nausea
- Confusion
- Decreased sexual function and libido (Your hormone levels can be monitored during your treatment)

Many of these side effects will resolve over days or weeks. Constipation often persists and may require additional medication. If other side effects persist, different opioids may be tried, or they may be discontinued.

You Should NOT:

- Operate a vehicle or machinery
 - Driving while taking opioids for chronic pain is considered medically acceptable as long as you
 do not have side effects such as sedation or altered mental status. These side effects usually do
 not occur while taking opioids/narcotics chronically. However, it is possible that you could be
 considered DUI if stopped by law enforcement while driving.
- Consume ANY alcohol while taking opioids/narcotics
 - The effects of alcohol and sedatives are additive with those of opioids/narcotics. If you take
 these substances in combination with opioids/narcotics, a dangerous situation could result,
 such as coma, organ damage or even **DEATH**.
- Take any other non-prescribed sedative medication while taking opioids/narcotics

Patient's	Initials:	
Patient s	initials:	

RISKS

Dependence

Physical dependence is an expected side effect of long-term opioid/narcotic therapy. This means that if you take opioids/narcotics continuously, and then stop them abruptly, you will experience a withdrawal syndrome. This syndrome often includes sweating, diarrhea, irritability, sleeplessness, runny nose, tearing, muscle and bone aching, gooseflesh, and dilated pupils. Withdrawal can be life-threatening. To prevent these symptoms, the opioids/narcotics should be taken regularly or, if discontinued, reduced gradually under the supervision of your physician.

Tolerance

Tolerance to the pain-relieving effect of opioids/narcotics is possible with continued use. This means that more medication is required to achieve the same level of pain control experienced when the opioid/narcotic therapy was initiated. This may occur even though there has been no change in your underlying painful condition. When tolerance does occur, sometimes it requires tapering or discontinuation of the opioid/narcotic. Sometimes tolerance can be treated by substituting a different opioid/narcotic. When initiated, doses of medications must be adjusted to achieve a therapeutic, pain relieving effect; upward adjustments during this period are not viewed as tolerance.

Increased Pain (Hyperalgesia)

o The long-term effects of opioids/narcotics on the body's own pain-fighting systems are unknown. Some evidence suggests that opioids/narcotics may interfere with pain modulation, resulting in an increased sensitivity to pain. Sometimes individuals who have been on long-term opioids/narcotics, but who continue to have pain, note decreased pain after several weeks off the medications.

Addiction

- Addiction is a primary, chronic, neurobiological disease, with genetic, psychosocial, and environmental factors influencing the development and manifestations. It is characterized by behaviors that include one or more of the following:
 - Impaired control over drug use
 - Compulsive use
 - Continued use despite harm
 - Craving

RISK TO UNBORN CHILDREN

Children born to women who are taking opioids/narcotics on a regular basis will likely be physically dependent at birth. Women of childbearing age should maintain safe and effective birth control while on opioid/narcotic therapy. Should you become pregnant, immediately contact your physician and the medication will be tapered and stopped.

LONG-TERM SIDE EFFECTS

The long-term effect of opioid/narcotic therapy is not fully known. Most of the long-term effects have been listed above. If you have additional questions regarding the potential long-term effects of opioid/narcotic therapy, please speak with your physician.

Patient's	Initials:	
rauciica	iiiilais.	

PRESCRIPTIONS & USE OF OPIOID/NARCOTIC MEDICATIONS

Your medication will be prescribed by your physician for control of pain. Based on your individual needs, you will be provided prescription medication short term or post operatively.

- You agree and understand that increasing your dose without the close supervision of your
 physician could lead to drug overdose, causing severe sedation, respiratory depression and/or
 death.
- You agree and understand that opioid/narcotic medication is strictly prescribed for you, and your
- opioid/narcotic medication should NEVER be given to others.
- You agree to fill opioid/narcotic prescriptions at one pharmacy.
- You agree to secure your opioid/narcotic medications in safe, locked source to prevent loss or theft. You are responsible for any loss of theft.
- You agree that lost, stolen or destroyed prescriptions or drugs will not be replaced, and may result
 in discontinuation of treatment.
- You agree to obtain opioid/narcotic medication from one prescribing physician or that physician's substitute if your prescribing physician is not available and your prescribing physician has authorized his or her substitute to provide treatment.
- You agree to submit to blood and/or urine testing to monitor the levels of medication or other
 drugs and any organ side effects. You also agree that other doctors and law enforcement may be
 notified of the results.
- You understand and agree that if you lose your medication or run out early due to overuse, you may experience and go through withdrawal from opioids/narcotics. You further understand and agree that you are solely responsible for your own medications.
- You agree to provide a list from your pharmacy detailing all medications received from that pharmacy and to provide updated lists as requested by your physician.

For patients taking methadone: Methadone has significant interactions with many other medications. Some of these medications may reduce your body's ability to metabolize methadone, thus INCREASING the methadone in your body, which could be dangerous. Therefore, you MUST notify this office of ALL medications prescribed for ANY condition while taking methadone.

OPIOID/NARCOTIC THERAPY MAY BE DISCONTINUED IF YOU:

- Develop progressive tolerance which cannot be managed by changing medications
- Experience unacceptable side effects which cannot be controlled
- Experience diminishing function or poor pain control
- Develop signs of addiction
- Abuse any other controlled substance (this may be determined by random blood/urine testing)
- Obtain and or use street drugs (this may be determined by random blood/urine testing)
- Increase your medication without the consent of your physician
- Obtain opiates/narcotics from other physicians or sources
- Fill prescriptions at other pharmacies without explanation
- Sell, give away, or lose medications
- Violate any of the terms of this agreement

Patient's	Initials:	
-----------	-----------	--

BY SIGNING BELOW, I ACKNOWLEDGE AND AGREE TO THE FOLLOWING:

- I have read and fully understand the Physician/Patient Informed Consent and Agreement for Opioid/Narcotic Therapy for the Treatment of Pain
- I have been given the opportunity to ask questions about the proposed treatment (including no treatment), potential risks, complications, side effects, and benefits
- I knowingly accept and agree to assume the risks of the proposed treatment as presented
- I agree to abide by the terms of this agreement
